NOW PROVIDED BY LEADING PHYSICIAN AT

CENTRAL | CANCER  
GEORGIA | CARE

Now available to new and existing patients

Call 478.743.7068

Veronica L. Sudekum, M.D.

## What is Supportive Care?

Specialized field that focuses on providing holistic care to cancer patients, their caregivers, and families. Its primary aim is to improve the quality of life of patients by addressing their physical, emotional, and psychological needs. The supportive oncology physician works together with our oncologists to provide comprehensive care to patients.

## Is Supportive Care right for me?

Supportive oncology can help you with managing symptoms, treatment decisions, making medical plans and coping. Through the use of:

- Medications and complementary therapies
- Symptom Management
- Supportive Counseling
- Advance Care Planning

## What is the cost to me?

Most health insurance plans, including Medicare and Medicaid, cover all or parts of supportive care, if it is received while in a hospital, outpatient clinic, rehabilitation, or skilled nursing center. It's covered like other medical or hospital services. You may have a copay like you have for other covered services.
